RE: MCL Violation Notice, PWSID #2100802

Ms. Karla Goodman,

In August 2013, the U.S. Census Bureau received a notice from the Indiana Department of Environmental Management regarding contaminants found in the Jeffersonville Federal Center water system. Following this violation notice, the U.S. Census Bureau responded to IDEM with options to address the Notice of Violation.

Since that time, the U.S. Census Bureau has been working with the U.S. General Services Administration (GSA) to address and resolve the notice of violation. We have selected an option previously identified in the original response to IDEM, and will permanently transfer all water supply and distribution to Indiana-American Water Company (INAWC). Furthermore, we will abandon and physically separate the four (4) ground water wells and water tower from the water distribution system.

Our project plan includes the following deliverables:

1. INAWC will identify the water lines and title information to transfer and provide main lines for their services.
2. GSA and INAWC will complete and execute a Memorandum of Understanding.
3. If required, GSA will complete a disposal process to transfer related GSA-owned water lines to INAWC.
4. INAWC will supply, distribute, and meter water to all properties on the water distribution system including non-government properties.
5. GSA will complete a NEPA checklist prior to abandoning the ground water wells and water tower.
6. GSA and U.S. Census Bureau will abandon the ground water wells and water tower in accordance with the Department of Natural Resources guidelines and 312 IAC 13.

We are developing a project schedule and will provide within the next two (2) weeks.

Sincerely,

(b) (6)

Joseph J. Mulligan  
Project Manager, U.S. General Services Administration
